

# 7HERTZ

COMPANY PROFILE

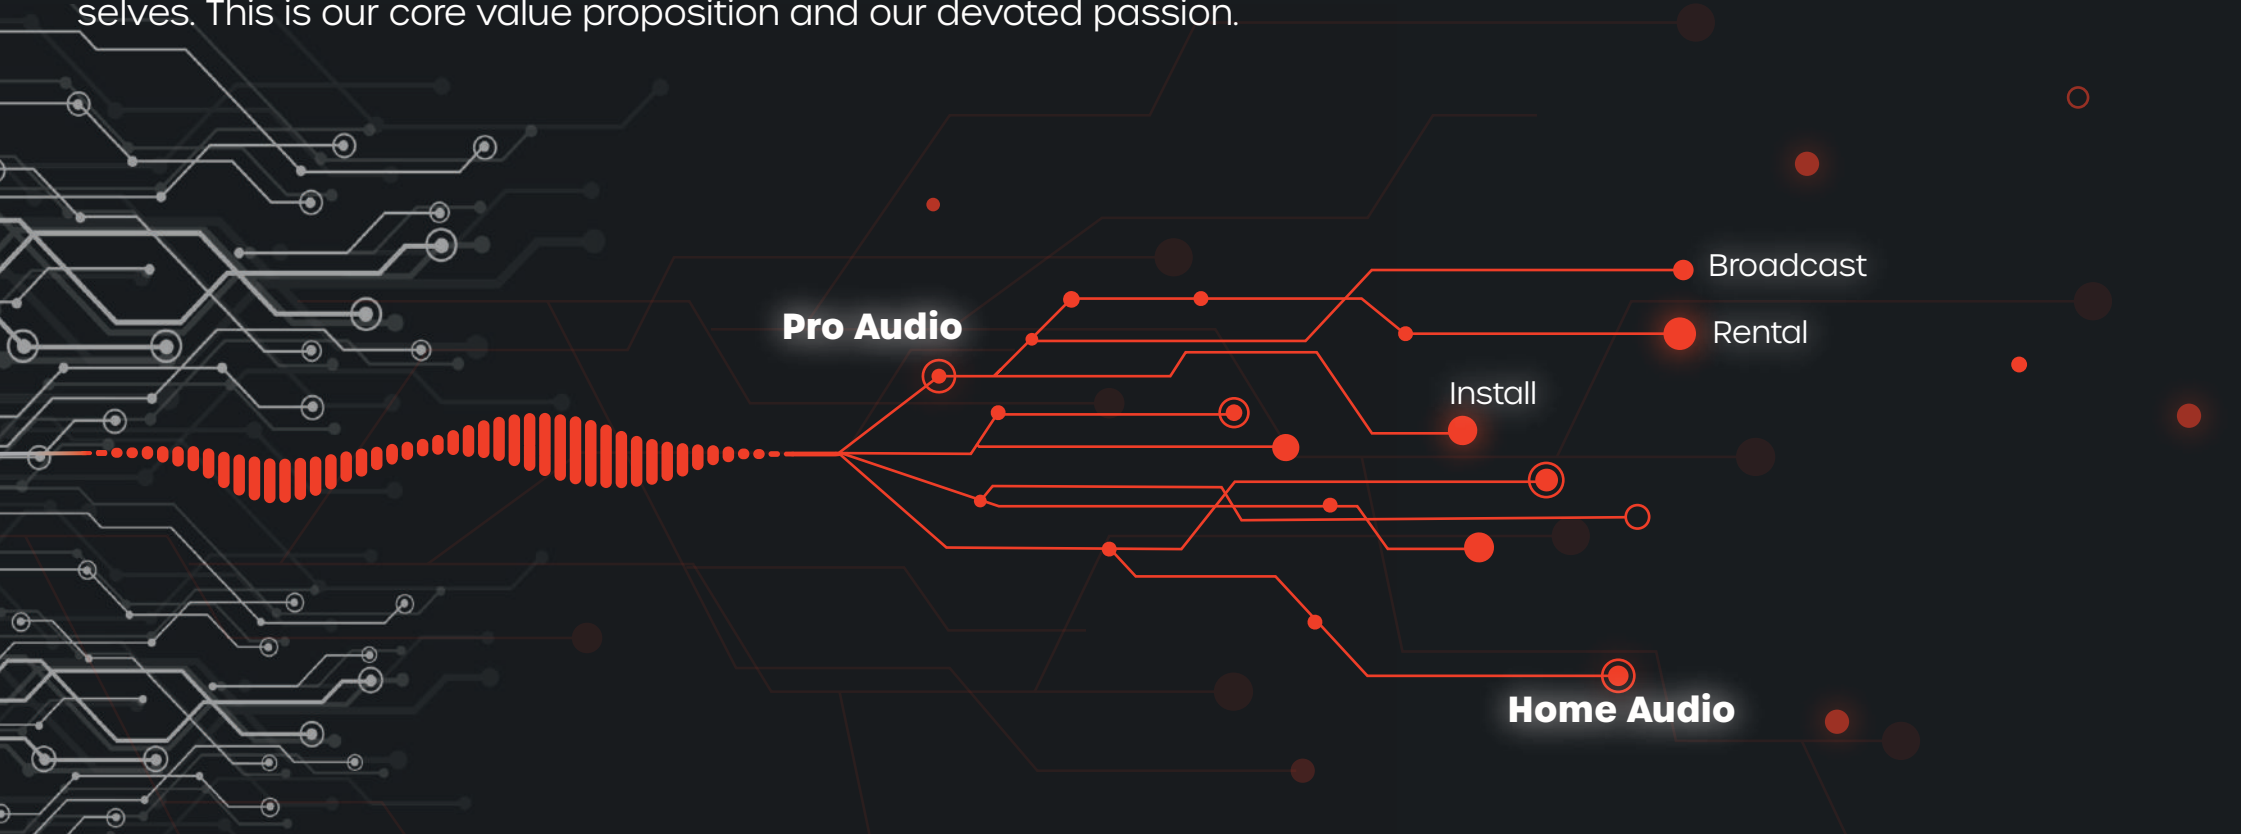

## THE SCIENCE BEHIND US

---

Founded in 2009 in Beirut and now headquartered in Dubai, 7Hertz is a specialist distributor of high-end professional audio equipment. We work with a hand picked portfolio of leading global brands to supply and support audio solutions across the Middle East, GCC and Lebanon.

Our focus is on delivering outstanding audio experiences through product expertise, system design, and hands-on engagement with our partners. We offer distribution, design consultancy, training, and commissioning services, all rooted in a deep understanding of the technologies we represent.

We believe that knowledge-sharing and strong technical support are as important as the products themselves. This is our core value proposition and our devoted passion.

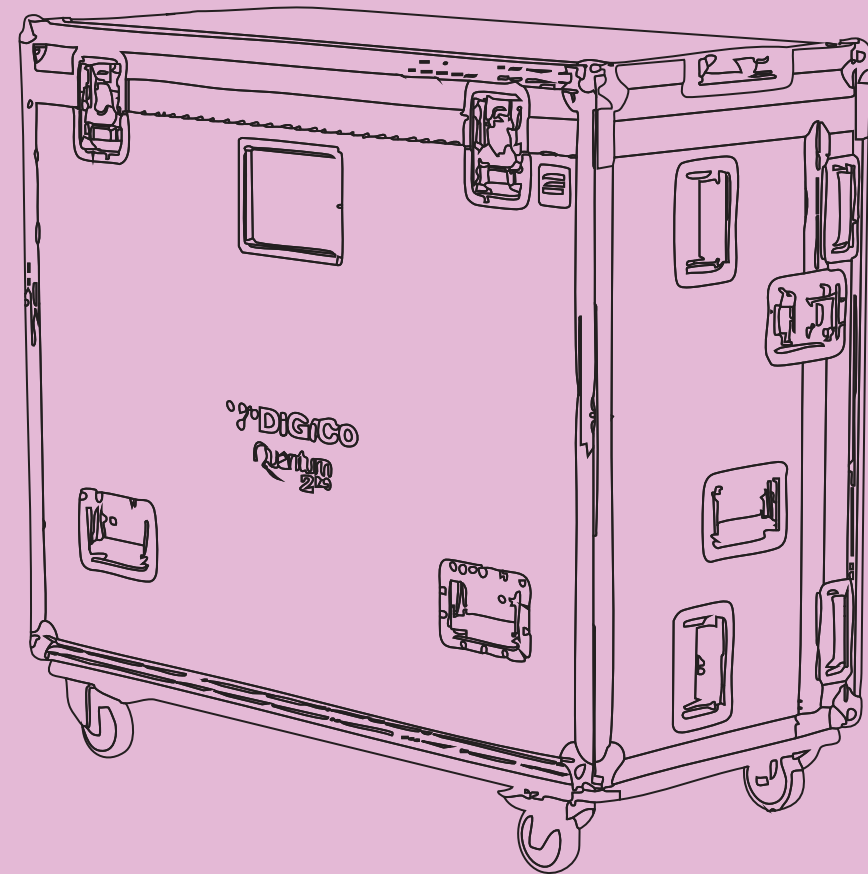

In live events, reliability is non-negotiable.

At 7Hertz, we forge partnerships with all the region's rental companies to provide guidance on robust, scalable audio solutions that meet the demands of all live sound scenarios, from concerts to corporate conferencing and everything in between.

Our goal is to ensure you're equipped to deliver on time, on spec, with confidence and without compromise.

## What We Offer

- We specify and supply rider ready, proven equipment with no weak links.
- We support your teams with technical guidance and training
- We are committed to future proofing, helping you build balanced, interoperable inventories
- We serve live, corporate and hybrid event suppliers with distinct precision

## Brand Applications – Live & Rental

### Wireless Audio

Sound Devices Astral – Spectrally agile digital wireless platform with advanced features for high channel count live and location work

DPA N-Series – Ultra compact radio mic systems with premium sound and strong RF performance

### Microphones

DPA – Premium headset, lavalier and instrument microphones trusted across live, theatre and corporate applications for their natural sound and reliability

### Audio Format Conversion & Network Infrastructure

DirectOut – High performance, modular audio interfaces for AoIP, MADI and analogue. Engineered for redundancy, format bridging and control in mission critical live systems

Agora – Audio optimised network switches designed for live production, with AVB/Milan, Dante, AES67 and robust redundancy features.

## Brand Applications – Live & Rental

### Mixing Consoles

DiGiCo – World class consoles for all event types, with scalable, flexible I/O, fibre optics, and high level integrations with Fourier, Klang and Sound Devices Astral

### Immersive Personal Monitoring

Klang – Personal IEM systems with intuitive spatial control, seamlessly interfacing with DiGiCo, Fourier and Sound Devices Astral for cohesive stage monitoring workflows

### Premium Loudspeakers

T SOUND – Compact, high output loudspeakers with cardioid control, modular rigging and sleek architectural form factors

EM Acoustics – Proven touring grade systems with uncompromising voicing, throw and system coherence from club scale to full arenas

### Portable PA Systems

HK Audio, Quest Engineering – Compact, scalable systems ideal for corporate shows, break-outs and mobile productions
